

Saturn Studio – Credencial GitHub

Para obtener las **credenciales de GitHub** en Saturn Studio, sigue estos pasos:

1. Acceso al módulo GitHub

Ingresa al **módulo GitHub** en Saturn Studio y haz clic en el botón **New** para crear una nueva credencial.

The screenshot shows the Saturn Studio configuration interface for a 'Wait for an Event' task. At the top, there is a red header bar with the text 'Wait for an Event' and several utility buttons: a code editor icon, a 'Test Command' button, a 'Docs' button, and a close button. Below the header, the main configuration area includes:

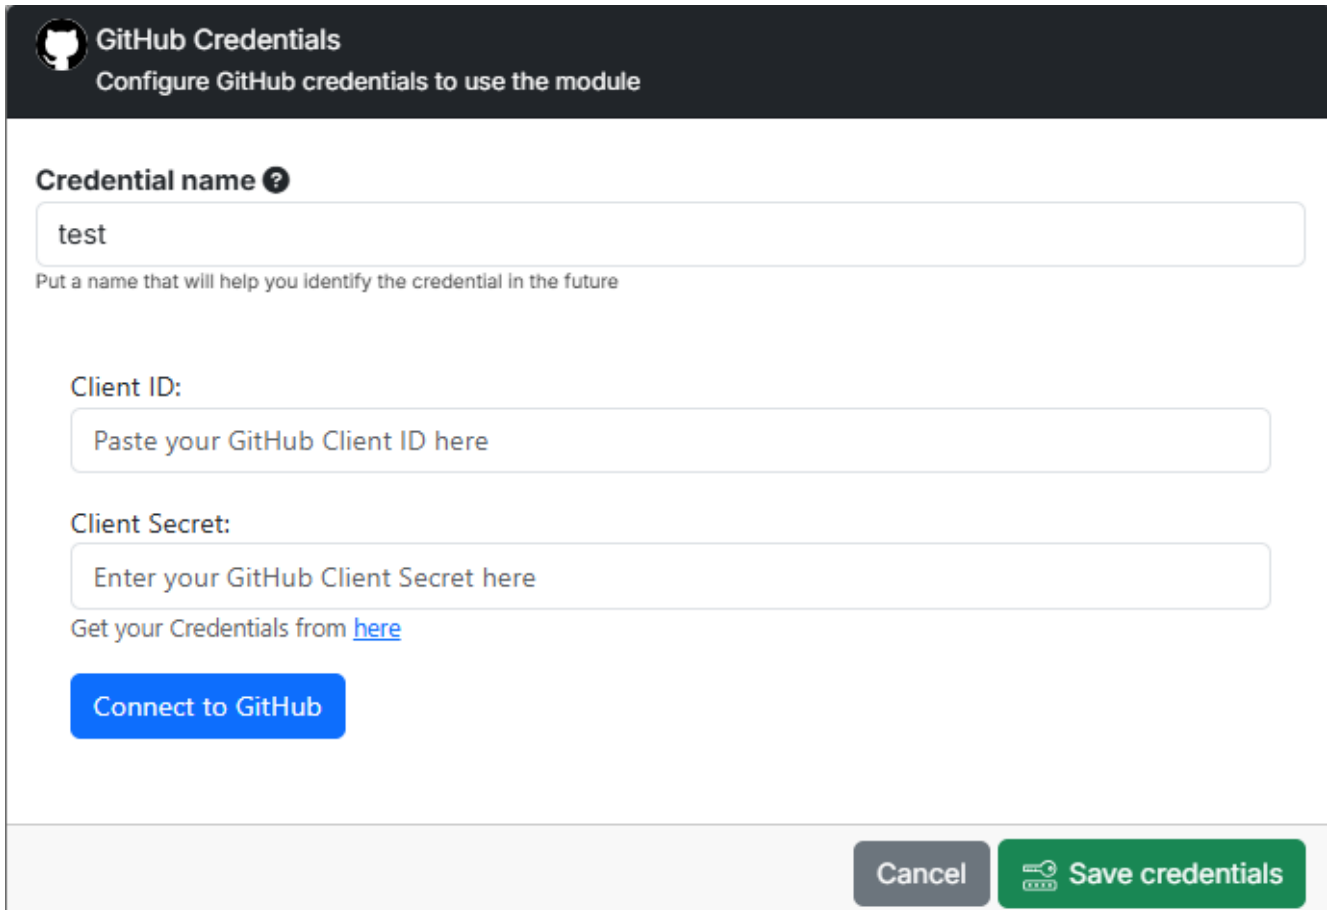

- An 'Add a description' field with a pencil icon.
- A task name field containing 'Wait for a GitHub event'.
- A 'Credential' dropdown menu with a 'New' button to its right. Below the dropdown is the text 'Select the GitHub credential you want to use'.
- An 'Event' dropdown menu.
- A checkbox labeled 'Simplify data'.
- An 'Assign result to variable' dropdown menu with the text 'Select one'.

At the bottom right of the configuration area, there are two buttons: 'Cancel' and 'Ok'.

2. Completar los campos

En el módulo deberás completar los siguientes datos:

- **Nombre:** Nombre identificador para la credencial.
- **Client ID**
- **Client Secret**

The screenshot shows a dialog box titled "GitHub Credentials" with the subtitle "Configure GitHub credentials to use the module". It contains the following elements:

- A "Credential name" field with a question mark icon, containing the text "test". Below it is a note: "Put a name that will help you identify the credential in the future".
- A "Client ID:" label above a text input field containing the placeholder "Paste your GitHub Client ID here".
- A "Client Secret:" label above a text input field containing the placeholder "Enter your GitHub Client Secret here".
- A link below the Client Secret field: "Get your Credentials from [here](#)".
- A blue button labeled "Connect to GitHub".
- At the bottom right, there are two buttons: a grey "Cancel" button and a green "Save credentials" button with a key icon.

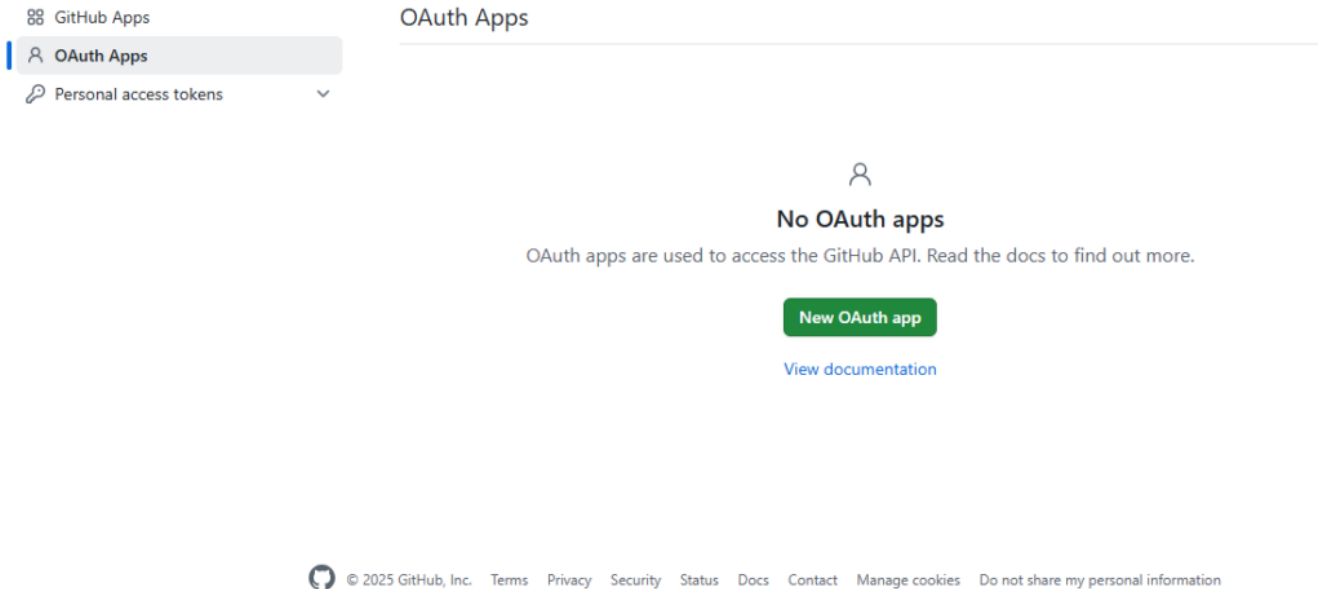

3. Obtener el Client ID y Client Secret de GitHub

Haz clic en el enlace que aparece debajo del campo para ser redirigido a la **página oficial de GitHub**.

Si no tienes una cuenta, **regístrate** primero.

4. Crear una nueva OAuth App

Una vez registrado, accede a la sección **Developer settings > OAuth Apps** y selecciona **Create a new OAuth App**.

Completa los campos requeridos (nombre de la app, URL de callback, etc.).

Application name *

Saturn Studio

Something users will recognize and trust.

Homepage URL *

https://studio.rocketbot.com/flow?d=8845037558e6b1cf76d1a9d3!

The full URL to your application homepage.

Application description

Automatización

This is displayed to all users of your application.

Authorization callback URL *

https://studio.rocketbot.com/

Your application's callback URL. Read our [OAuth documentation](#) for more information.

Enable Device Flow

Allow this OAuth App to authorize users via the Device Flow.

Read the [Device Flow documentation](#) for more information.

[Update application](#)

5. Generar las credenciales

Después de crear la app, GitHub te mostrará:

- **Client ID:** visible inmediatamente.
- **Client Secret:** se genera mediante un botón y debe copiarse inmediatamente ya que se muestra solo una vez.

Client ID

Ov231ivr30IhFkme0ofY

Client secrets

Generate a new client secret

Make sure to copy your new client secret now. You won't be able to see it again.

Client secret

Added now by

Never used

Delete

You cannot delete the only client secret. Generate a new client secret first.

Copia ambos códigos.

6. Ingresar los datos en Saturn Studio

Regresa al módulo **GitHub** en Saturn Studio y pega el **Client ID** y el **Client Secret** en sus respectivos campos.

GitHub Credentials

Configure GitHub credentials to use the module

Credential name ?

Put a name that will help you identify the credential in the future

Client ID:

Client Secret:

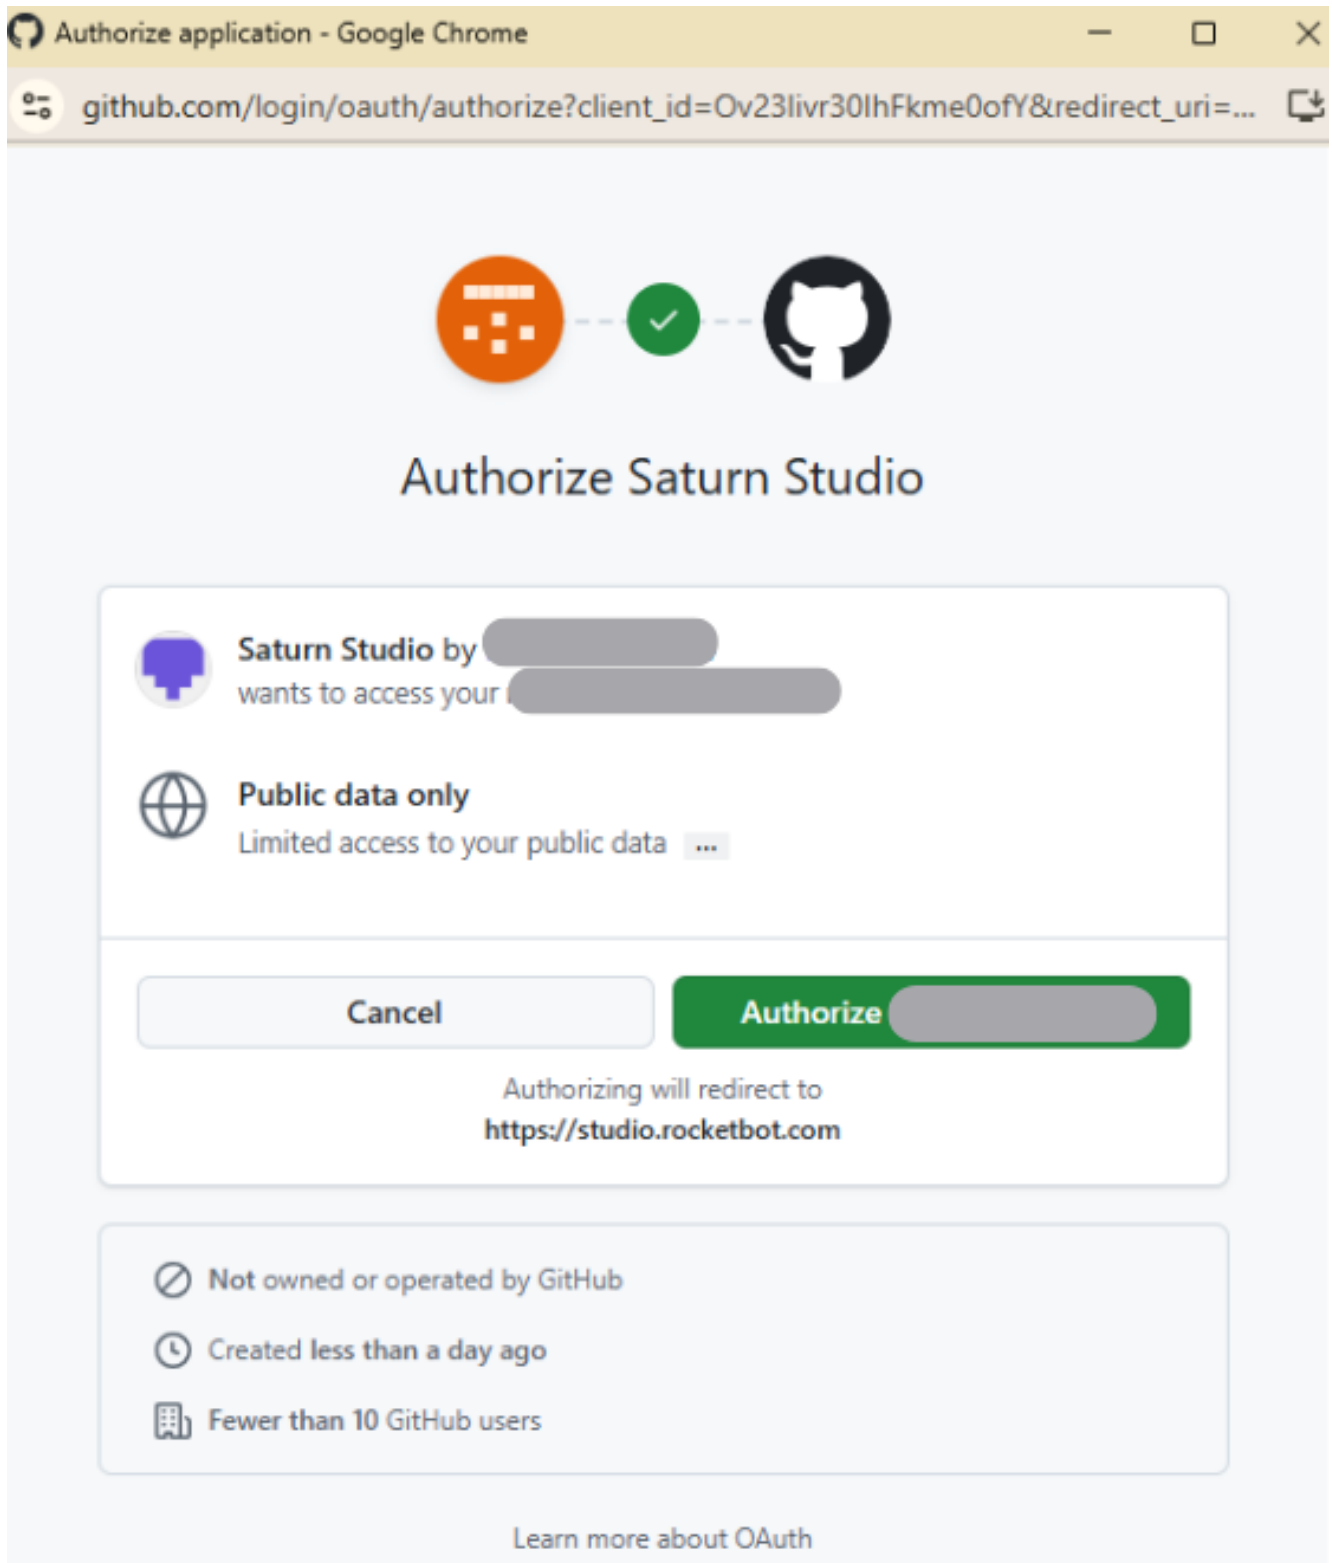

Get your Credentials from [here](#)

Connect to GitHub

Cancel Save credentials

7. Conectar con GitHub

Haz clic en el botón **Connect to GitHub**.

GitHub te pedirá **autorización para conectar con Saturn Studio**. Una vez concedido el permiso, las credenciales quedarán configuradas correctamente.
