

## Captura de Pantalla

Obtiene una captura de pantalla de toda la pantalla.

Sólo debemos pasar la ruta donde queremos guardar la captura, indicando el nombre y la extensión (.png o .jpg).

The image shows a dialog box titled "Captura de Pantalla" (Screenshot). At the top left is a camera icon. At the top right are icons for Linux (Tux), macOS (Apple), Windows, and Ubuntu. Below the title bar is a light blue instruction bar: "Obtiene una captura de pantalla de toda la pantalla" (Obtains a screenshot of the entire screen). Below this is the label "Ruta donde guardar la captura PNG o JPG" (Path where to save the PNG or JPG capture). A text input field contains "C:/screen.png" and a "Buscar" (Search) button is to its right. At the bottom right are two buttons: "Agregar Comando" (Add Command) in blue and "Cancelar" (Cancel) in grey.
